uvex 1 business

So comfortable and flexible, you wouldn't know it's safety footwear

Whether you're in the office or on the factory floor, the uvex 1 business safety footwear looks stylish paired with chinos, a suit or work trousers.

Providing reliable protection against workplace hazards, the new extra-wide steel toe cap protects your toes against falling objects and impacts. The flexible, non-marking, slip-resistant mono polyurethane sole features a soft EVA insert for increased comfort. Innovative uvex climazone technology protects your feet against excess perspiration by wicking moisture away from the foot and regulating the internal temperature, reducing moisture build up. These smart lace-up shoes and boots are the ideal choice for those who work in both office and factory environments and place equal value on style, safety and comfort.

High wearer acceptance

This ultra-lightweight range of safety footwear in a modern business look is available in S2 and S3 versions, in stylish blue or grey and allows for continuous working and time efficiency.

Proven safety

The extra-wide steel cap, metal-free, penetration-resistant insert and non-slip outsole, which exceeds the requirements of the standard for shock absorption by almost 100%, provide optimum protection.

Breathable materials

The highly breathable, leather and chrome-free materials and antistatic comfortable insole ensure a pleasant foot climate, even during when worn all day.

Comfortable fit

The innovative easy to clean, abrasion resistant microvelour material with soft padding and insole with additional shock absorption around the heel and forefoot guarantee a pressure-free fit.

climazone

General features:

- Modern, ultra-lightweight and flexible S3 and S2 safety shoes: safe, stylish and super comfortable in a modern business look
- Made from water and abrasion resistant, breathable synthetic materials, making them suitable for people allergic to chrome
- All sole materials are free of silicones, plasticisers and other paint wetting impairment substances

Protection features:

- Meets the ESD specification with volume resistance under 35 megaohms
- Robust, extra-wide steel toe cap for maximum wearer comfort
- Ergonomically designed outsole made from polyurethane with excellent slip resistance
- Penetration-resistant, non-metallic midsole in accordance with the latest safety standards, does not restrict flexibility

Comfort features:

- Outstanding wearer comfort thanks to a newly developed last and climate-optimised, breathable materials
- Made from high-tech, breathable, easy to clean microvelour for a soft, comfortable fit without pressure points – soft padded collar and tongue further enhances comfort
- Removable antistatic comfortable insole, with a moisture transport system and additional shock absorption around the heel and forefoot
